

YADNYESH BHARAT JUVEKAR, PMP®

Mobile: +919980057410 Email: yadnyesh.juvekar@gmail.com

Highly proficient, team-oriented professional looking to provide effective solutions in a timely and cost effective manner, by **rendering my expertise in Project Management to leverage technology for enabling business teams meet their goals**

PROFESSIONAL SUMMARY

- Certified project manager with 12+ years' of rich professional experience in **Merchandise Presentation, Product Design and Development, Partner Resource Management, Order Processing, and Inventory management** domains.
- Around 5+ years of hands-on, Project Management **experience in Agile Scrum, Waterfall and Iterative methodologies** coupled with excellent Stakeholder Management and People management skills. Knowledge of Complete SDLC, **directly managed team in – Project Initiation, Analysis, Design, Construction, Testing and Implementation** phases.
- Extensive experience of Project management through Business Function Study, Requirement Finalization, Project Scoping, Task breakdown, effort and schedule **estimation, costing, project budgeting** and **earned value management, efficient resource allocation**, Risk management and Stakeholder management
- Have a proven track record of leading multi-million dollar, enterprise-wide implementations that streamline operations, improve processes, optimize productivity, and introduce system efficiencies in a cost effective manner. Ability to work in fast-paced environments that demand strong organizational, technical and interpersonal skills.
- Proven experience in leading cross-functional teams and implementing large, complex technology systems throughout project lifecycle from conceptual design through production support.
- Strengths include good analytical skills, ability towards meeting deadlines and deliverables while achieving excellence and quality of work.
- A team player who works well with others regardless of their level or background; deals with disagreements or different points of view in a constructive, successful manner; maintains positive relationships even under difficult circumstances
- Strong verbal and written communication skills and able to effectively work with diverse teams

SKILLSET - MANAGERIAL

- Experience in anchoring project proposals worth up to \$8M, which includes planning and preparation for Business representative approval.
- Preparing Project Budgets, Resource estimation, Staffing Plan, Project planning, technical direction, effort estimation, Program and Project reporting, status reporting, employee appraisals and mentoring.
- Successfully demonstrated the role of SCRUM master in a distributed project team by helping team members to work together in the most effective manner possible, focused on removing impediments to progress, facilitated meetings and tracked progress and issues.
- Effectuating Development Process for accomplishment of Project on Time Delivery, Within Budget, Scope and to meet delivery milestones.
- Understanding and coordinating business needs / enhancements, effectively managing Functional and Technical leads to deliver customization of product to provide solutions as per the business requirements.
- Developing and sustaining effective relations with vendors ensuring effective stakeholder management
- Responsible for preparation of Request For Proposal (RFP), Statement of Work (SOW), Change requests, WBS, estimation of required staffing for the Project, identification of dependencies between activities and their priorities, Preparation of schedule, Project Plans and dashboard.

SKILLSET - TECHNICAL

Operating Systems	Windows, Linux
Programming Languages	Java, PHP, JSP, Servlets
Frameworks	Java EE, Spring, Hibernate
Javascript Frameworks	JQuery, AngularJs, NodeJs
Databases	Oracle, MS SQL, MySQL, MongoDB
Bulid Tools	Maven, Gradle
Data Interchange Format	JSON, XML, SOAP and REST webservice
Version Control	MSTFS, CVS, Github
Development Tools	Eclipse, TOAD, Sublime Text
Project Tools	MS Project, Clarity, Open Work bench

EDUCATION

- Bachelor of Computer Engineering – First class with honors Goa University, August 2002
- H.S.S.C – Distinction Goa Board, April 1998
- S.S.C – Distinction Secured 1st Rank in Examination Centre Goa Board, April 1996 (among ~15K students)

CERTIFICATION

- PMP – Project Management Institute, USA. Certified in Aug 2014 Validity till Aug 2017

EMPLOYMENT RECITAL

- **Project Manager** – Target Corporation India, Bangalore – April 2008 till date
- **Applications Developer** – Oracle India Pvt. Ltd, Bangalore – From 17th April 2006 – 13th April 2008.
- **Sr. Technical Associate** - Opus Software Solutions, Pune (09th January 2006 to 31st March 2006)
- **Assistant Manager (IT)** – Zuari Industries Limited (16th October 2002 to 07th January 2006)

PERSONAL PROFILE:

Date of Birth: 17-June-1981

Address: C-804, Purva Venezia, Major Sandeep Unnikrishnan Road, Yelahanka, Bangalore - 560064

Project Highlights

Key Projects executed as Project Manager / Lead

ProjectWise (VMT) Infrastructure Upgrade:

The objective of this project was to upgrade Visual Merchandising Tool (VMT) - a CAD tool used for Adjacency Automation to create transitions during merchandising processes.

As the PM driving this critical \$6M project my focus was to gather detailed customer requirements, constraints, and assumptions with stakeholders in order to establish the project deliverables. In addition to this I

- Partnered with multiple stakeholders to Prepare Statement of Work (SoW) that stated internal and external dependencies that needed to be addressed by vendor partner - Bentley Systems Inc.
- Monitored and Controlled the execution of Analysis, Design and Construction phases of the project, escalated risks and collaborated with infrastructure teams to address and mitigate the risks
- Cultivated network with people across multiple locations in Minneapolis (USA), Bangalore, Pune and Chennai in India to appropriately involve them leading to successful management and execution of the project.

Strategic Planning Funnel (SPF):

This \$8M project was focused on developing - Strategic planning that Merchant (business users) – an application used to tie Strategic priorities to financial goals. The project followed Iteration methodology for the Phase I and Agile Scrum from Phase II of the project. In this project I -

- Strategized and Partnered with Business users and played an instrumental role in building confidence among , the team for an earlier release to deliver high business value stories which has helped the business to save approximately \$600K and approximately 1000 man hours.
- Played the role of Scrum Master and designed an effective sprint plan and ensured that high business value stories are delivered, with a logical reasoning for the mix of each sprint which was accepted by the team and BPC's.
- Designed, discussed and implemented an effective plan to address the knowledge gap on the functionalities with Business users using the live meeting recordings, which thereby saved a lot of productive time for both the teams and the same was appreciated across locations.

Assortment Analysis Application:

The goal of this \$1.5M project was develop an application to enable 500+ buyers in forecasting future assortments by viewing historical Sales, Inventory, Financials, and Profitability metrics. As a PM on this project my responsibilities included planning of multiple tracks to provide a working solution within the cost and schedule constraints of the project. I was involved right from the beginning to the closing phase of the project. The multiple tracks followed mix of Iterative and Waterfall methodology

Food Nutritional Software Implementation:

As the PM for this project my role was to partner with business evaluate various “Out of the Box Products” that enabled to generate nutritional information labels for customized mix of food products. I worked with Business users to first collect inputs from different vendors through a “Request for Proposal” and then on identify the best product through fit-gap analysis and then engage the vendor through Statement of Work while simultaneously forming a team to implement customization of selected product according to the needs of the end users. We followed Agile Scrum methodology to achieve business goals

Grovesite Enhancements:

The project is a SaaS implementation, my role on this project was to first collaborate with Business users to determine the enhancements required to the existing system and then to engage a vendor - Grovesite through a contract to implement the enhancements in timely and cost-effective manner using Agile Scrum Methodology.

Key Projects executed as Technical Resource

3D – TechRefresh:

3D TechRefresh is the migration project for Target's Supply & Distribution Chain. This was my first project where I successfully lead a team of 8 resources to successfully build Oracle database as the backend for the project.

OPN Competency Center & OPN Programmatic Partner Enablement Plus:

The OPN (Oracle PartnerNetwork) Competency Center (OPN CC) provides focused and customized learning for Oracle Partners. The Oracle PartnerNetwork (OPN) Programmatic Partner Enablement Plus is an internal tool available to authorized users to manage Oracle partners and Solutions offered by Oracle partners. My Contribution on these projects was to complete design and coding PL/SQL procedures, functions and triggers in very aggressive deadlines, I was also responsible for writing data migration scripts to migrate data from old system to this system.

Comprehensive Material Management System (CMMS):

CMMS is a standalone application that provides a complete solution to address the Indenting, Purchase, Stores and Inventory management requirements. It seamlessly integrates Purchase, Stores, and Accounting processes of the Inventory Management Activity

Technologies: Developer 2000, Oracle Forms 6.0, Oracle Reports 6.0, Oracle 10g (Migrated from 8i to 10g).

As a developer my role in the project was to

- Design and creation database tables, triggers, functions and procedures.
- Developed forms to automate process in the modules involved and reports for document printing and MIS. Automating Invoice generation for payment towards freight and handling of goods. Automation of approvals and clearances across the systems. Co-coordinating with end users for system enhancement, taking up new requests, carrying out impact analysis and developing new functionalities as per business needs.

Web Based Order Booking System:

The project involved creating web based sales management software. The software allowed booking orders, tracking particular order, cancellation of orders, pending order reports, dispatch status and reports. My role was to conduct the System Analysis in partnership with business users and then come up with High and Low level Design. I was also involved in creation of database tables, triggers, functions and procedures
